DETAILED ACTION

1. This is in response to the Applicant's amendments and arguments filed on November 22, 2005 in which claims 6, 9, 12, 19, 24, 28, and 30 have been amended, and claims 1-5, 11, 17-18, and 26-27 have been canceled. Claims 6-10, 12-14, 19-25, 28-34, and 40-49 are currently pending.

Allowable Subject Matter

2. After a further search and thorough examination of the present application and in view of the applicant's arguments and amendments, claims 6-10, 12-14, 19-25, 28-34, 44, 41-43, 46-49, and 45, renumbered as 1-32 respectively, are found to be in condition of allowance.

3. The following is an examiner's statement of reasons for allowance: the cited prior arts teach a signal quality measurer is used to measure uplink signals from two antennas of a base station, the measurer's antenna is placed equidistantly the two antenna so that the delays from both antennas are equal.

On the other hand, the Applicant teaches, inter alia, after measuring a delay difference between the two branches of the radio link, determining an average of the plural delay difference values with respect to the plural cells, and using the average delay difference to determine the delay adjustment value. These limitations, in conjunction with all limitations of the independent claims, have not been disclosed, taught, or made obvious over the prior art of record.

The Applicant further teaches, inter alia, using the total delay value and the hardware delay value to determine an angle of arrival for the radio link signal received from a non-test user equipment unit. These limitations, in conjunction with all limitations of the independent claims, have not been disclosed, taught, or made obvious over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
